

## Illustrator (Ai): Alphabet Cards

**Task:** Use the Shape, Shape Builder, Pen, and/or Curvature Tools in Illustrator to create a set of three (4) Alphabet Cards.

*What is an Alphabet Card?*

- It's a flash card that displays a letter, an image of a subject that starts with that letter, and the complete word of that subject.

*What else should these Cards have?*

- You will need to make cards for 4 consecutive letters (ex. ABCD, HIJK, QRST)
- OR –
- You can make 4 variation cards of 1 letter (ex. A – Apple, Alien, Aardvark, etc.)
- Each card must have the letter, a drawing of a subject that starts with the letter of the card, and the complete word of the subject in the drawing.

*These should not be copies of something else, but you can use an existing image as inspiration.*

***Do not use the Type Tool. All the content of your cards should be made by you.***

Experiment with colours and stroke settings to see how they interact with your ideas. You can get more information about using colours in Illustrator [here](#).

**Criteria:**

**Technical** (15 marks)

- Each design is created using the Drawing Tools outlined above.
- Attempts at using colour and stroke with designs.
- Clear use of layers

**Creative** (15 marks)

- Designs are recognizable.
- Each design is unique and/or complementary.
- Appropriate scale of items.

**Category:** Projects

**Total Value:** 30 marks
