

InDesign is a common application for creating wireframes (mock-ups of apps and websites). All apps and websites you use have gone through a wireframe stage during their development.

**Task 1: Create a personal playlist screen using InDesign.**

**Task 2: Create a themed\* playlist screen using InDesign.**

*\*Theme can be anything you wish.*

*This could be a workout playlist, a specific holiday, driving, or even something school centric.*

### Details:

- Theme and songs are up to you – use an existing playlist or one of your own as the inspiration.
- File Specs: More Presets -> Mobile -> iPhone X
- Background colour, gradient, or texture.
- Use a personalized photo or [find one](#) for your playlist banner.
- Write a brief bio or message for the text below the banner.
- Appropriate albums cover images for your song choices.
- At least 6-8 songs for each playlist.
  - o *Depends on the size of your sections.*
- Tool Bar icons
  - o [you can find lots of options here \(sign-up required\)](#).

### Criteria

#### Technical – 18 marks

- Layout and Hierarchy
  - o *title banner and info at the top.*
- Consistent size and spacing for songs in playlist.
- Clear use of layers to stack elements properly.
- Tool Bar Menu at the bottom
- Proper document sizing and Package method for final copies.

#### Creative – 18 marks

- Consistent theme for each playlist.
  - o *colours, genre, images, etc.*
- Use of shapes, colours, typefaces.
- Smaller design features
  - o *icons, images, etc.*

**Total Value: 36 marks**

**Category: Portfolio**
